Tuscany Silk	90% Silk/ 10% Polyester	1/8"   3-5%   4"		x	x	x	x	x					x	x		x		NO!*

For **heavily stitched projects**, we recommend our Tuscany Silk or Tuscany SUPREME Cotton batting - they won't stiffen, even when heavily stitched!

For **t-shirt or denim quilts**, we recommend Thermore batting - no shrinkage so panels stay flat; lightweight, great for an already-heavy quilt; stitch up to 10" apart for more design options

For **show quilts** we recommend Tuscany Wool batting as a top batting layer (wool fiber doesn't retain creases!) and our cotton | cotton blends make a great bottom layer, adding weight/drape

For **art quilts** we recommend using Thermore or Tuscany Silk batting - they're lightweight, drape well and provide emphasis to small details

For **modern quilts** requiring a lot of open space, we recommend Thermore and Heirloom Natural w/Scrim - Thermore: stitch up to 10" apart; Heirloom Natural w/Scrim: stitch up to 8" apart

For **hand-quilting**, we recommend our Tuscany Wool or Tuscany Silk battings, or our Thermore, PolyDown or Tuscany Polyester battings - they're a dream to quilt with!

For **jelly roll rugs and bags/totes** we recommend our Heirloom 80/20 Fusible - it makes quick and easy work of joining the fabric & batting and provides great stability!

\*For **microwave bowls** - we DON'T recommend ANY of our products for use in microwaves - cotton's moisture level can vary and this could cause a fire!
